Cloud Services |

What is NCSAM?

National Cyber Security Awareness Month (NCSAM) is the national initiative to promote cyber security. It is meant to educate Americans and raise awareness about staying safe online.

This year, the theme of NCSAM is "Our Shared Responsibility," reminding us that we all have a role in cyber security. Join us this October for four seminars that will provide helpful tips and information on various topics, relevant to the Mason community.

The seminars will be held every week from 2 to 3 p.m. in the Johnson Center, 3rd Floor Meeting Room B. Each week will feature a different topic, with presentations and interactive activities. Check out the IT Security web site at <http://itsecurity.gmu.edu> for additional resources, as well as StaySafeOnline.org for more tips and tricks.
